PROFESSIONAL SUMMARY

Computer Science student and full-stack developer with hands-on experience building AI-enabled, voice/chat, and web applications through hackathons and independent builds. Experienced with React, Next.js, Python, C++, RAG workflows, APIs, and modern frontend tooling, with a growing focus on cybersecurity.

EXPERIENCE & HACKATHON BUILDS

Full-Stack Developer, *Dukaan Saathi — TakeOver'26 Hackathon*

2026

- Built a WhatsApp- and voice-based digital ledger for small Kirana store owners in English, Hindi, and Telugu.
- Designed a bahi-khata-inspired interface using paper texture, rubber-stamp, and ledger-book patterns to match the target users' mental model.
- Developed a working trilingual prototype with voice recognition, live chat parsing, simulated OCR, and a live ledger dashboard; fixed JavaScript word-boundary handling for Devanagari script.
- Extended the backend schema with owner profile fields (name, email, address, GST number, logo), including migration logic and validation.

Developer, *Disha AI*

2026

- Built a six-agent personalized education and career navigator covering planning, profile analysis, career guidance, education/scholarship search via RAG, roadmap generation, and synthesis.
- Delivered the application as a single-file HTML artifact with live Anthropic API calls.

Web Developer, *SA Palm Meadows*

2026

- Built a luxury real-estate website for a premium eco-friendly gated villa community in Hyderabad.
- Designed an 18-section web experience with a cinematic hero, animated counters, masonry gallery, Google Maps integration, and Framer Motion animations.

EDUCATION

BTech Computer Science, 2nd Year, *NxtWave Institute of Advanced Technologies*

CGPA: 8.2 | Hyderabad

TECHNICAL SKILLS

Languages

Python, C++, JavaScript, TypeScript, Kotlin, HTML, CSS

AI & APIs

RAG, Anthropic API, Groq, Voice Recognition (Sarvam STT), OCR Workflows

Data & Deployment

SQLite, Turso (libSQL), Vercel, Twilio WhatsApp API

Soft Skills

Problem Solving, Teamwork & Collaboration, Communication, Adaptability, Quick Learning, Time Management

Frontend & Web

React, Next.js, Vite, Tailwind CSS, Express, Node.js, Framer Motion, Three.js

Cybersecurity

Network Security, Vulnerability Assessment, Security Fundamentals, Incident Response

Tools

Git, GitHub, Android (Bluetooth & Audio APIs)

PROJECTS

Dukaan Saathi [GitHub ↗](#)

WhatsApp- and voice-based digital ledger for small Kirana store owners; trilingual (English, Hindi, Telugu). Full stack: Express + libSQL/Turso backend, Claude-powered intent parsing, Sarvam voice-to-text, Twilio WhatsApp, a web WhatsApp simulator and live shop dashboard (sales, profit, inventory, dues, 7-day trend). Planned: B2B credit/Udhaar ledger, Razorpay integration, and reporting.

CyberMem — AI Incident Response Agent [GitHub ↗](#)

HackWithHyderabad 3.0 project. Security-operations agent that combines Groq LLM analysis with Vectorize Hindsight long-term memory to recall what worked and failed in past incidents, generate evidence-backed response plans behind a human-analyst approval gate, and retain post-mortems to improve future responses. Built in TypeScript.

Disha AI

Six-agent personalized education and career navigator combining planning, profile analysis, career guidance, RAG-based scholarship search, roadmap generation, and synthesis, powered by live Anthropic API calls.

EchoLink (WaveMic) [GitHub ↗](#)

Native Android app (Kotlin) that turns a phone into a real-time wireless microphone, with Bluetooth device discovery and selection, live audio capture and playback (AudioRecord/AudioTrack), gain control, and a transmission dashboard.

VaaniAI+ [GitHub ↗](#)

Real-time, context-aware voice assistant built with Node.js, Express, and the Web Speech API, designed for Murf AI text-to-speech integration; aimed at education and productivity use cases.

Ganesh Run — Chase the Blessings [GitHub ↗](#)

Interactive 3D endless-runner web game inspired by Temple Run and Indian temple architecture, built for a college hackathon showcase with Three.js, Vite, and the Web Audio API; runs offline with no backend or external CDNs.

SA Palm Meadows

Luxury real-estate website for a premium eco-friendly gated villa community, featuring cinematic UI, animated counters, masonry gallery, Google Maps, and motion animations.

Personal Portfolio [GitHub ↗](#)

Dark-themed, single-file HTML portfolio website with a scroll-zoom hero section.

ACHIEVEMENTS

Takeover Hackathon	Finalist
Adobe University Hackathon 2026	Participant
National AI/ML Hackathon by AVEVA	Participant
Google Gemini QuizOff 2026	Participant
HackWithHyderabad 3.0	Participant
MRDU Hackathon	National-Level, Participant
IIT Hyderabad Hackathon	Participant
